

**East Fishkill Conservation Advisory Council
Community Day September 2000 Participation
2000 Special Projects Award**

The East Fishkill Conservation Advisory Council had a display table at the annual East Fishkill Community Day in September 2000. The CAC contracted GIS services from the Environmental Management Council to prepare GIS maps of Town wetlands and open space. Color reproductions of the maps were made and distributed to attendees at Community Day. The CAC hopes to use the maps as vehicles to raise public awareness of the importance of wetlands and open space at a time when development pressure within the Town of East Fishkill is intensive.
