

**North Castle Conservation Board
Creation of the Wampus Brook Pathway
2000 Action Award**

This project is a joint effort of the North Castle Conservation Board and the Parks and Recreation Board of the Town of North Castle. It is a plan for a path from the Connecticut state line north to the Westchester County owned Wampus Lake Park. The project, which is part of the North Castle 1996 Master Plan, has already received a grant of \$156,000 from NYS under the Transportation Enhancement Program. This represents 80% of the cost. The remaining funding will be provided by the Town.

The total Wampus Brook Pathway will provide a path of approximately three miles through the central part of Armonk. As of this moment, several parts of the pathway have been approved. Other parcels have yet to be acquired. When complete, it will provide pedestrian access through the central part of Armonk and provide access to various facilities for those who do not have vehicular transportation.
