NYSACC 2024 Conference on the Environment

The New York State Association of Conservation Commissions will hold its annual conference from Wednesday, September 18th through Friday, September 20th. Our host this year is the Tug Hill Commission (<https://tughill.org/>), a unique state agency charged with “helping local governments and citizens shape the future of the Tug Hill region.”

September 18th will be virtual Wednesday, when the workshops, networking, and major speakers will take place on NYSACC’s GatherTown platform. In-person activities include our reception on Thursday evening, with field trips on both Thursday and Friday.

More details and a registration link to come.

Please forward this notice to members of your Board, Commission or Committee.

Introducing our Host Area

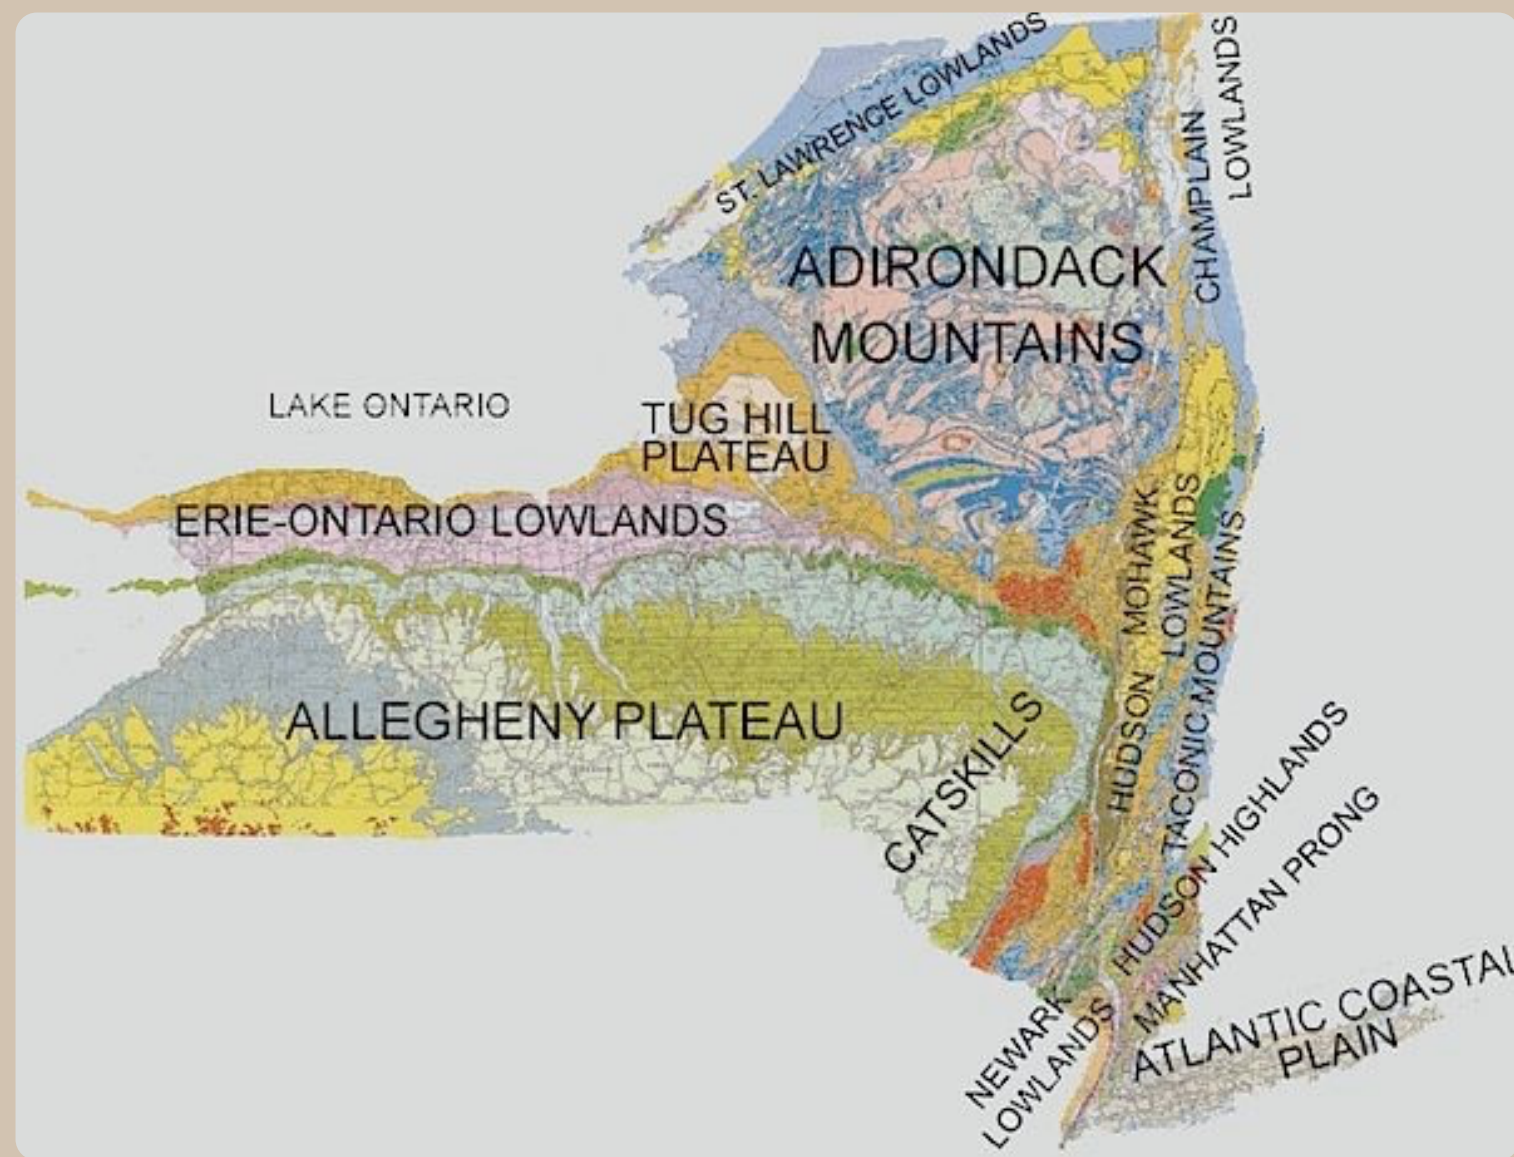

Wind Power and Fall Foliage on Tug Hill Plateau.

Upper Salmon River Reservoir.

Tug Hill Commissioners.

The Tug Hill Plateau is centrally located within NY State.
